Comments from the Prez

By Mike Kasrich, AJ9C

It's been a while since I have posted Prez comments in the BH. For that I apologize. For those of you that don't know I work in the unemployment benefits field and since the fall, work has been crazy to say the least. Couple that with the top section of my tower doing a corkscrew upside down and radio has taken a bit of a back seat.

We have a summer full of events coming up that the membership needs to get behind and support. The ARRL June VHF QSO Party is rapidly approaching and we are defending Champs in Unlimited club competition. While this has been a nice feather in our collective caps, we can not become complacent. We should all ask ourselves what are "we" going to do to improve our score from last year. That could be as simple as getting on for an extra hour if possible, adding a band, or just participating where you did not in previous years.

This is important. We have had the numbers to qualify for unlimited but we do need the quality and quantity of scores to improve so we can remain number 1. Without that, it would be possible for the top clubs in Medium to get a few more scores and challenge us if not beat us in unlimited. Kevin has done, and continues to do, an excellent job in organizing and beating the drum for this contest. Lets all pull together and do it again.

(Continued on page 3)

Rock the QSO Parties

In an effort to increase SMC activity, we're encouraging everyone to actively participate in state QSO parties in 2009. A calendar listing the state QSO parties for 2009 has been posted on the SMC website. Let's make a concerted effort to rock the state QSO parties.

7th Call Area QSO Party	13Z, May 2 to 07Z, May 3, 2009
Indiana QSO Party	16Z, May 2 to 04Z, May 3, 2009
New England QSO Party	20Z, May 2 to 05Z, May 3, 2009 and 13Z-24Z, May 3, 2009

Adventures in SO2R Land - Part 5

By Bill Axelrod ND9E

So, here I am in Central Illinois. Much to my surprise, I have received a number of notes asking me to continue this series. So here goes.

Prolog. And then fate intervened. I decided it was time to retire. Sold my 40 acres of radio heaven (almost heaven, West Virginia – right?) along with towers, antennas, beverages, etc. and moved to East Peoria. If the snow ever melts I'll be putting up a whole new set of antennas, re-establish my SO2R station, et. al. But will I do it right this time? Have I learned

SMC Dues

Dues are \$10 a year, but may be waived based on the fulfillment of participation requirements:

In the SMC SS circle: Make 100 total Sweepstakes QSOs over the two weekends and submit your score(s) for "Society of Midwest Contesters." In addition, submit one other score for an SMC club competition in one of the following contests: ARRL VHF, 160m, or 10m, NAQP, CQWW, ARRL DX, etc.

Outside of the SMC SS circle: Submit two scores per year for SMC club or team competition in any of the six NAQPS and four Sprints.

Qualifying scores are those submitted during the calendar year prior to January 1.

Donations are still accepted

You can make your payment two ways:

1. Send a check, money order, or cash to:

Zig Markowski - KM9M
50 E. Eureka Drive
Lemont, IL 60439-3970

2. Use Paypal and email your donation to dues@w9smc.com.

Upcoming VHF Events

The June VHF Party is fast approaching. Time to get everything in operating order! We have won the unlimited club competition for the last two years. Please let me know if you are planning on working this contest, as we should be able to win again if we get everyone on for this event.

The July CQ VHF is also a popular contest, please plan on getting on for this contest. It is a 6 and 2 band shoot-out with no low power class, so the name of the game is to get as much power on the air as possible. This is a portable class for the low power guys, however.

6 Meter FFMA Grids. There are a number of rare US grids being activated this summer on 6 meters. On page 5 is a list of grids that I know of. Please check into the FFMA Yahoo user's group for updates. Often, there will be trips announced on very short notice, and usually, the FFMA group contains posts on such trips.

Central States is also upon us. SMC is co-hosting as suite this year. We need volunteers for the suite. Who can help? Please let me know. The event is in Elk Grove this year, so please make plans to attend. I would love to see a great turn-out of SMC members at CSVHF. Here are the details:

43rd Annual CSVHFS Conf. Conference Schedule

This schedule is subject to update. This is **generally** what you can expect...

Thursday, 23 July 2009

- Registration Desk 1500 - 1900
- Thursday Night Social 1730 - 2000 Pig Roast - Poolside
- [Hospitality room](#) 2000 - later
- BoD meeting 2030

Friday, 24 July 2009

- Registration Desk 0700 - 1900
- [Antenna Range](#) 0700-1130
- [Rover/Dish display](#) 0800-1130

(Continued on page 4)

(Continued from page 1)

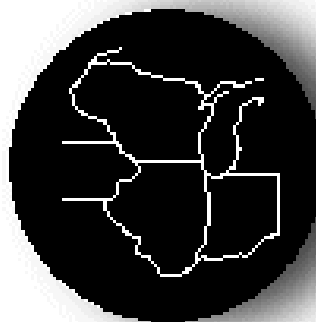

We are still co-sponsoring a hospitality suite at the Central States VHF conference in July. Be sure to put that event on your calendar. This year it will be held near Chicago. It's an excellent opportunity for our Chicago area members to volunteer to run the suite and get together to show the flag. I know I plan to attend if my schedule falls in place.

Finally the 2009 edition of ZOfest will occur again in the first part of August. We are still looking for folks wanting to make presentations. Contact Ralph K9ZO if you have a hankering to be presentation famous. Just ask Craig K9CT how easy it is! This year we are not going to fill the day with presentations and will include more face/social time. Make your plans to bring your excess radio items to sell, demonstrations to set up, and tall stories to tell.

For those of you on a limited radio time operation budget keep the weekly high and slow speed Sprint ladders in mind. These contests are only a half hour in length and give you a whole bunch of contesting in a short period of time. Our own Mike/W9RE sits on the board for this contest and helps promote it each week. More details can be found at <http://www.ncccsprint.com/default.htm>. The contest even has it's own email reflector nccc-blue@kkn.net. Feel free to contact W9RE.

All of us on the Board are keeping our ears open for activities to get the club involved in. This is a club with a large membership and the Board doesn't have a monopoly on ideas. If you have suggestions, ideas or odd thoughts on how this club can better serve you all, please drop any of us an email or a land line. This is not a cult of personality, and as an organization will only be as good YOU all in the membership. Get up, speak out and participate!

for now 73. Ninecee

(Continued from page 1)

some lessons? You bet. Will I learn from these lessons? Wait and see.

On Wednesday, November 12 2008 My wife, dog, and I arrived in East Peoria late one evening after a 14 hour drive from the Washington DC area. We had bought a house here and already had the first shipment of furniture delivered and set up, food in the fridge, and drinks on the sideboard. It would seem that the next step would be to set up a radio, throw an antenna up, and get ready for the coming weekend's SSB Sweepstakes. And, of course, air out my new call sign ND9E.

Not gonna happen. One great thing about moving to Peoria is that we have family here. One not-so-great thing about moving to Peoria is that they were there waiting for us with a hot dinner on the table and drinks poured. By the time they left that night it was time to quietly pass out in the bed after a very long day.

Thursday morning brought an orgy of unpacking stuff and making the house habitable and get ready for the following Monday the day the final movers delivery was due. It takes a more dedicated ham than me to tell the XYL "Hon, you unpack the first 50 cartons while I play with my radios". I ain't gonna do that; no way. I wanted to live long enough to enjoy my hard won retirement.

But Thursday night I did find room for my operating table. Found and set up my computer and one radio. And I threw up a vertical wire from the second story window and ran a coax into my basement shack tuner and called CQ. Wow! Did I ever get out well.

All 12 of my telephones started ringing. The lights in the living room flashed with my keying. Most of the GFI power outlets tripped. My alarm system alarmed. Darn, that thing is loud. The dog started yelping and howling with all this activity and noise. Darn, that thing is loud.

Discretion being the better part of valor, I stopped my first CQ, told the police that the alarm was in error and that we were all safe, and reset everything. Subsequent investigation indicated that I could not operate at 100 watts. Anything above 5 watts would set-off the whole mess all over again.

What to do? The shipment with my decently long coax and other needed stuff to throw up antennas anywhere but on the house would not arrive until Monday. But I couldn't just couldn't ignore the upcoming SSB sweepstakes, especially as a brand new member of SMC. So, operate QRP I did.

Let's do the math – I don't like SSB contests. Life really is too short for QRP. So, QRP SSB SS – here I come.

So by now you probably got this hint that I don't much care for SSB contests. In fact, after my last SSB SS I opined that my next SSB SS would only happen after Hades froze over. Turned out that was a prophetic statement for a guy who just moved to the Black Hole.

Friday brought another exciting day of unpacking, moving furniture, getting telephone, television, and internet installed and operating. And Friday night, getting my, ugh, QRP station ready for the SS to start on Saturday.

Saturday morning got on 20 meters CW with 5 watts and my wire stuck to the side of the house. Wow – worked some DX. Saturday afternoon and SS time. Wow – worked about 100 QSOs with my puny 5 watts. Got some pretty good comments about my signal strength. And thought "You know, this Black hole stuff really isn't so bad". Little did I know.

Preview... So there I was, the Saturday morning one week after the SSB sweepstakes, contemplating my boxes of radios, wire, coax, miscellaneous junk, trees, open land, hills and valleys and trying to lay out my systems engineering plan to rebuild my SO2R station square in the middle of the black hole.....73 and GL... Bill ND9E
